Amy J. Ryan
Graphic Design Portfolio

Charity Publishing: Prescott Valley Cares Magazine

For over a decade, I've been a key player at Charity Publishing, LLC, where I've poured my heart and soul into producing top-notch designs for Prescott Valley Cares and its sister magazine, Chino Valley Cares. As a graphic designer, my role has been multifaceted, from crafting eye-catching business ads to spearheading the design and layout of the publications themselves. But my contributions don't stop there. I've also taken charge of maintaining the website, ensuring that all aspects of our online presence are as polished and professional as our print publications. With my creativity and attention to detail, I've helped bring these magazines to life, highlighting the amazing work being done by local organizations and businesses.

American Security Products: Gun Safe Catalog

For 15 years, I had the privilege of working for American Security Products, where I was tasked with producing their yearly Gun Safe Catalog - a project that required precision, creativity, and a deep understanding of the product. From start to finish, I took charge of the design and layout of this catalog, carefully curating resources like photos, illustrations, and specification tables to bring the product to life on the page. Each year was a fresh opportunity to showcase the latest and greatest offerings from this industry leader, and I relished the challenge of creating a catalog that was both informative and engaging. Thanks to my dedication and attention to detail, this catalog became a staple for the company, helping to drive sales and cement their position as a go-to source for high-quality gun safes.

American Security BFX Gun Safe Door

in 2020, American Security launched a new product they call the “Active 4x Locking System.”

For their catalog and advertising, the goal was to introduce our dealers to this new product line, and educate them on the advantages.

The first step in this process was to take images of the front of the safe, and then the interior of the door, so that customers could see the locking system clearly.

I came up with a new logo specifically for the “Active 4x Locking System.” Then I created an info graphic that we placed into the catalog which outlined the unique features of this product.

we also designed a landing page for information on this product line, and an advertisement that was placed in the Locksmith Ledger magazine with a QR code to the landing page.

CC3R COIN RECYCLER

Make Change, Easy

If you want our two cents, you're probably spending too much time manually counting coins. Get the CC3R Coin Recycler and give your employees out of the back cash room fast.

For years, retailers have relied on cash recyclers to improve operational efficiency, and now you can realize the same benefits from our coin recycler.

The American Security CC3R Coin Recycler is an automated, fully certified safe optimized with all the technology required to process coin. It quickly dispenses \$1 amounts in the morning. And at the end of the day, it counts, sorts and deposits 1,000 coins in one minute.

Win Back Time With Better Visibility

Our Coin Recycler allows multiple users to simultaneously withdraw and deposit coin from separate access points. American Security Software solutions are designed to give you clear visibility of your cash inventory with real-time reporting. Staff can open, conduct audits and close quickly without waiting in line for a manager's supervision.

And accountability is guaranteed, coin is secured and the need for a manager's supervision is eliminated.

Protect What Matters Most

Backed by the best warranty in the industry, police, fire, sportsmen, jewelers, coin and art collectors depend on our safes to protect the things that matter most to them - shouldn't you?

Burglary - Fire - Gun - Home - Business

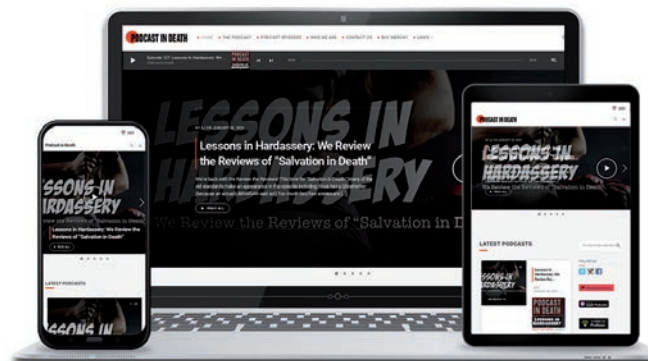

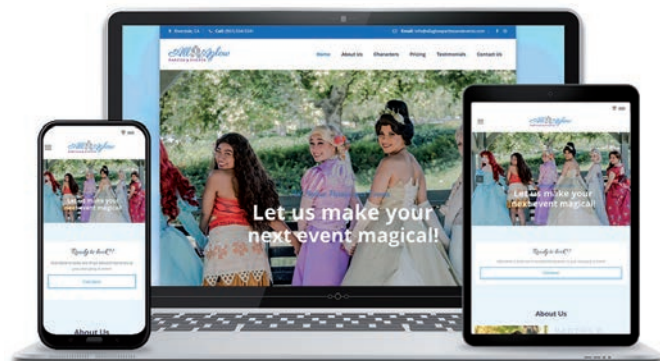

www.americansecuritysafes.com

One of my tasks while working for American Security was to re-design their Pop-Up Banners that the sales team would take to trade shows. The previous banners had different designs based on the product line that was being represented. But, American Security decided they wanted a more cohesive look for all the banners.

I came up with several designs, but once a final design was approved of, I found images for each safe line they wanted to do a banner for, found a safe photo to represent that product line, then a "lifestyle" image that represented the audience they wanted to capture.

The sales team ended up loving the design, and the new pop-up banners fit the overall look of the tradeshow booth very well, giving the booth a more professional look.

Website Design

I discovered website design while working as a Graphic Designer in the in house Print Shop for Fleetwood Enterprises. I taught myself HTML and took over the design and maintenance of Fleetwood's corporate website until the company's unfortunate bankruptcy.

Since then, I have designed and maintained websites for several of the companies I worked for, including American Security, Casablanca Fan Company, Charity Publishing and All Aglow Parties and Events. I also designed a website for the Riverside Dickens Festival, and currently design and maintain my own websites at: ajryanmedia.com, ajryanphotography.com and podcastindeath.com

Image Editing: AMSEC Barrett Branded Gun Safe

In 2011, American Security partnered with Barrett Firearms to create a line of Barrett branded gun safes. These safes featured a pull out gun rack. For the images, our manufacturing plant created a sample pull out rack, but it one more gun space than the final rack would have.

As you can see in the photo, most of the rifles used were replicas with orange tips. For the final image, I edited all of those guns so that the tips were black, got rid of one gun rack space and added wood flooring to make the photo look as it might in a customer's home.

Product and Portrait Photography

While working for American Security, I was given the opportunity to take on their product photography. I was fortunate to be able to learn this valuable skill on the job, and created a company wide process of organizing photography to make it accessible to all departments within the company as well as to our sales partners.

Several of my images were submitted to photo competitions with the Inland Empire Photographers and Videographers group and two of my images won "Best in Category" awards.

In addition, I have a part time portrait photography business and have won 3 Bronze Awards from The Portrait Masters (theportraitmasters.com).
